Securefast

SBL700 Easy Code Mechanical Digital Lock

The SBL700 offers a simple and convenient means of providing security for low to medium traffic areas such as store rooms, workshops, plant rooms and offices and is supplied complete with a 60mm backset deadlocking tubular latch.

Changing the code on the SBL700 could not be easier as the code can be changed while the unit is still fitted to the door.
The large turn knob on the inside and outside of the unit is universal for left and right hand opening doors.

Features & Benefits

- Easy code change without having to remove the unit from the door
- Large turn inside and outside and with lip at the base of the outside unit to pull the door open on outward opening doors
- Over 800 different non-sequential code combinations
- 10 digit non-sequential code, with cancel function button
- Passage function button
- Suitable for timber doors from 40-54mm in thickness
- Suitable for internal and external use
- Compact and robust heavy duty zinc die cast body
- Supplied with 60mm backset deadlocking tubular latch
- Optional 70mm backset latches are available on request
- Spare coding keys are available on request

60 mins Fire Rated

Fire-rated mechanical digital locks are supplied complete with intumescent attached ready for installation.
